# Pathways to Research Preeminence

The VPR office is responsible for the strategic vision for research, and developing and executing initiatives to accomplish that vision, as well as the various compliance and support areas. VPR works to catalyze, support, and safeguard UVA research.

## ACCELERATORS:

## Research Areas

### CENTER FOR COMPARATIVE MEDICINE

CCM supports research and teaching that utilizes laboratory animals, promoting the policies set by the Institutional Animal Care and Use Committee (IACUC) to oversee compliance with federal regulations and guidelines.

### ENVIRONMENTAL HEALTH AND SAFETY

The EHS supports the research, education and patient care activities of UVA through promotion of a safe and healthy environment for the University community.

### LICENSING & VENTURES GROUP

LVG partners with faculty, entrepreneurs, and investors to bring innovations discovered at UVA into the marketplace, navigating the legal & patenting process, promoting innovations to our partners and industry, and supporting the entrepreneurial and investment process.

### SPONSORED PROGRAMS

The Office of Sponsored Programs (OSP) facilitates research and research administration at UVA. OSP signs-off on grant applications and negotiates contracts and grants with a wide variety of sponsors. Once an award has been made, OSP provides a comprehensive service in award administration and regulatory compliance.

### RESEARCH COMPLIANCE

The VPR serves as the chief research officer for UVA, managing Institutional Review Boards and various safety committees, developing and negotiating human and animal welfare assurance documents with federal agencies, and developing policies on conflict of interest and handling investigations on research integrity issues.

### RESEARCH DEVELOPMENT

Community of Research Development (CoRD) is a cross-Grounds initiative that helps faculty discover opportunities for external support of their research and find collaborations across Grounds. The team provides support for proposals, manages the process for sponsored awards, and provides meaningful data analytics for research.

### RESEARCH REGULATORY AFFAIRS

Supports institutional activities subject to federal regulations governing export controls or requiring safeguarding of controlled unclassified information. Monitors federal legislative and regulatory activity impacting research activities. Works to prevent undue foreign influence on UVA research and researchers.

### GRAND CHALLENGES & INSTITUTES

Grand Challenges and Pan-University Institutes are joint efforts between the Executive VP & Provost office and the VPR. They both take a cross-disciplinary, innovative, and comprehensive approaches to major issues facing the world in the 21st century; that build on the strengths of current faculty and resources.
