Cutting-edge research in the School of Medicine is built on innovation and collaboration, bringing together diverse scientists, and spanning disciplines to pioneer the treatments and cures of tomorrow. Our overarching goal is to stimulate biomedical discovery that better the human condition.

**Office for Research**

https://med.virginia.edu/office-for-research/

The SOM Office for Research supports and promotes basic, clinical, and translational science and facilitates research synergies across UVA by leading or facilitating:

- Management of strategic initiatives;
- Development and maintenance of SOM research infrastructure;
- Administration of internal funding programs;
- Management of research space;
- Development of research policies; and
- Coordination of efforts with other schools, offices, and teams across Grounds.

**InterIm, Senior Associate Dean for Research**

Linda R. Duska, MD, MPH  
Professor, Department of Obstetrics and Gynecology

**Assistant Dean and Director of the Office for Research**

David L. Driscoll, PhD, MPH  
Associate Professor of Health Education

**Office for Research page for new faculty:**

https://med.virginia.edu/office-for-research/resources-and-collaborators/for-new-research-faculty/

**Office of Grants & Contracts**

https://med.virginia.edu/grants-and-contracts/

- Provides assistance to faculty and research administrators to obtain and manage sponsored awards that support scientific research, clinical studies, and other scholarly activities of the faculty and professional research staff
- Monitors and reports on funds received from outside sponsors and provides guidance on stewardship of those funds
